**GROB**  
passion in winding

## Batching unit

# ▶ RUNNER ◀

The Willy Grob batching unit Typ ▶RUNNER◀ is specially designed for applications in the field of mass production of standard fabrics such as Denim, apparel fabrics, general cotton or terry towel textiles etc.

The ▶RUNNER◀ convinces due to its **extraordinary price/performance ratio** without compromising in terms of machine and winding quality. Equipped with the latest drive technology as well as a convenient and easy operation system, this new compact batching unit allows the production of first class cloth rolls at lowest power consumption.

Composed as a universal device, the ▶RUNNER◀ can be installed behind all established weaving machine makes and permits thanks to the modular architecture the choice of different additional options.

## Technical sheet, options:

	Description	RUNNER
∅	max. batch diameter [mm]	1'300
↔	Nominal weaving machine width [cm]	190...230
▶	Velocity [m/min.]	up to 4.0
P	Input rating [kW]	0.18
⚙	Connection to weaving machine	✓
⚡	Emergency button	✓
Options		
↗m	Ejecting device – manual	○
💡	Inspection table (straight, inclined, with or without illumination)	○
Σ	Meter counter	○
	Rotatable deflection roller	○
	Cloth beam (aluminium – synthetic)	○

✓ standard  
○ option

## Factsheet:

- extraordinary price/performance ratio
- Installation independent from weaving machine make
- compact and clearly arranged construction
- cloth tension freely adjustable – at any time
- winding speed up to 4.0 m/min
- latest frequency-converter technology
- maintenance-free
- convenient operating system
